Purpose:

The delay line kit enables precise variation of the optical path length. This is a double pass delay line kit for the visible wavelengths.

Instructions:

Assemble products as shown in the image.
Use the iris diaphragm ID-0.5 installed in the MH-2P to help with beam height standardization. Optional additional iris diaphragms will help if the alignment is too challenging.

Please refer to detailed instructions in "DL Stage User's Manual", which can be found on line:
